EDUCATION

2022 - 2027	Integrated M.Tech at VIT UNIVERSITY AP	(CGPA: 8.84/10)
2020 - 2022	Class 12th TSBIE	(Percentage - 97.8)
2020	Class 10th SSC	(Percentage - 100)

SKILLS

Programming	Java, Python
AI/ML	Machine Learning, Deep Learning, NLP, OpenCV, TensorFlow
Backend & Databases	Spring Boot, Flask, RESTful APIs, SQL (MonetDB), NoSQL (Redis, Neo4j, MongoDB)
Developer Tools	Git, GitHub, Linux, Jupyter Notebook, VS Code

PROJECTS

COLLEGE CHATBOT | Python | Flask | Hugging Face (RoBERTa) | NLP models [March 2025](#)

- Developed an intelligent chatbot using a fine-tuned RoBERTa model to ensure precise intent recognition and context-aware response generation.
- Implemented a robust Flask-based backend featuring custom text preprocessing to facilitate low-latency, real-time user interactions.
- Optimized inference performance, achieving a 1.4s average response time to ensure a highly responsive user experience.

PHARMAMASKGUARD | Python | TensorFlow | Keras | OpenCV | MobileNetV2 [November 2024](#)

- Developed a real-time mask detection system using MobileNetV2-based CNNs to ensure workplace safety compliance.
- Designed an end-to-end CV pipeline, utilizing data augmentation and confusion matrix analysis for high model precision.
- Enabled live webcam inference, facilitating contactless compliance tracking with optimized frame-per-second performance.

SPRINGBOOT WELLNESS TRACKER | Java | Spring Boot | Maven | MySQL [August 2025](#)

- Developed a RESTful backend application using Spring Boot to manage users, moods, and daily activity tracking with structured CRUD operations.
- Designed a modular layered architecture to ensure clean code organization, scalability, and ease of testing.
- Implemented API endpoints for real-time data handling and persistence, enabling efficient tracking and management of wellness-related information.

ACHIEVEMENTS

- LeetCode Top 10% & Solved 200+ problems on Leetcode, CodeChef 2 star.
- Developed ViT-CNN-ECA, a hybrid transformer-convolutional network for brain tumor MRI classification; work accepted for publication in the RAISE DS 2025 conference.
